

Contents

Contents

1

1 Graph Theory Foundations

- 1.1 Introduction
- 1.2 Definitions
- 1.3 Paths, Cycles and Trees
- 1.4 Hamilton Cycles and Euler Circuits
- 1.5 Planar Graphs
- 1.6 Flows, Connectivity and Matching

2 Trees

- 2.1 Introduction
- 2.2 Acyclic Graphs
- 2.3 Trees
- 2.4 Forests
- 2.5 Rooted Binary Trees
- 2.6 Minimum Spanning Trees

3 Basic Algorithms and Graph Traversal

- 3.1 Introduction
- 3.2 Growth of Functions
- 3.3 Complexity
- 3.4 NP-Completeness
- 3.5 Breadth First Search
- 3.6 Depth First Search
- 3.7 Topological Sort

4 Planar Embedded Graphs

- 4.1 Introduction
- 4.2 Planar Testing
- 4.3 Embedding Algorithm
- 4.4 Drawing Planar Graphs

5 Vertex and Edge Coloring

- 5.1 Introduction
- 5.2 Vertex Coloring
- 5.3 Edge Coloring
- 5.4 Bipartite Graphs
- 5.5 K-paritte Graphs
- 5.6 Four Color Theorem
- 5.7 Proof of the five color theorem
- 5.8 Batch Processing Algorithm
- 5.9 Sequential Processing Algorithm
- 5.10 Ramsey's Theorem

5.10.1	Fundamentals	
5.10.2	Ramsey Theorem for Graphs	
5.10.3	Ramsey Theorem for Integers	
6	Independent Set	
6.1	Introduction	
6.2	Exact Algorithms	
6.2.1	The Brute Force Approach	
6.2.2	Robson's Algorithm	
6.3	Polynomial Time Exceptions of The Exact Algorithms	
6.3.1	Claw-Free Graphs	
6.3.2	P_5 -free Graphs	
6.3.3	Perfect Graphs	
6.3.4	Chordal Graphs	
6.4	Modular Decomposition	
6.5	Approximation Algorithms	
6.5.1	Poly-APX-complete Problems	
6.5.2	Baker's Algorithm	
6.5.3	Berman & Karpinski	
7	Subgraphs	
7.1	Introduction	
7.2	Arboricity	
7.3	Edge Searching	
7.4	Listing Triangles	
7.5	Listing Qudrangles	
7.6	Listing Maximal Cliques	
7.7	Complete Subgraphs	
8	Hamiltonian Circuits	
8.1	Introduction	
8.2	Hamiltonian Circuits	
8.3	Hamiltonian Walk	
9	Connectivity and Matching	
9.1	Introduction	
9.2	Connectivity	
9.3	Menger's Theorem	
9.4	Matching	
9.5	Tutte's 1-factor Theorem	
9.6	Stable Matchings	
10	Planar Separtor Theorem	
10.1	Introduction	
10.2	Planar Separator Theorem	
10.3	Applications	

10.4	Maximum Matching	
10.5	Minimum Vertex Cover	
11	Introduction to Flows in Planar Graphs	
11.1	Introduction	
11.2	Definition of single-sourced flows	
11.3	Definiton of multi-sourced flows	
11.4	Multi-soruced flows	
11.4.1	Foundations	
11.4.2	Feasibility	
11.4.3	DELTAFLOW	
12	Tutte Polynomial	
12.1	Introduction	
12.2	Basic Properties of Tutte Polynomial	
12.3	The Universal Form	
12.4	A Spanning Tree of the Tutte Polynomial	
12.5	Polynomials of Knots	
13	Shortest Paths with Non-negative Weights	
14	Shortest Paths with Negative Weights	
15	The Travelling Salesperson Problem
